

KOMORI

Open House

15 and 16 March 2023

Solve your puzzle!

High energy costs, lack of skilled human resources and reducing the environmental impact. Just three of the many pieces to the challenging puzzle of “how to increase your profit”. Where do you begin?

At Komori, we simplify the puzzle with innovative solutions!

We are pleased to invite you to the Komori Open House, taking place on Wednesday 15 and Thursday 16 March 2023. Discover the new Autopilot, Komori’s latest innovation for even faster and more automated print production. Commercial and packaging printers will be inspired with live workflow, print and post-press demonstrations, at the Komori Graphic Center – Europe in Utrecht, the Netherlands.

Komori is dedicated to adding value to your company and improving profits.

Are you ready to simplify your puzzle?

Make sure to reserve your seat. Register via the QR code or contact your local Komori representative to confirm your participation.

You can count on us!

Increase your profits with KP-Connect

Is your pressroom generating the highest daily profit? Reduce lost time and increase productivity with KP-Connect.

- Visualise operating information
- Increase efficiency and profitability
- Maximize press usage

KP-Connect visualises detailed and shareable press operating information in a secure environment. A breakdown of schedules and improvements contributes to increasing efficiency by analysing changeover times, registration and colour adjustments, printing and idle times.

The perfect solution for today's challenges

Komori's GL-837P advance provides unique solutions to overcome the important issues our industry faces such as: rising energy and materials costs as well as a lack of skilled operators.

- New Autopilot feature
- Optimal 16-page production
- Saving resources

Half-format printers can also step up to compete in new markets without the investment costs of a much larger machine.

Optional technology on the GL-837P advance allows users to guarantee the highest production and quality levels with the lowest reliance on busy operators. With our latest technology, Autopilot with a PDF checking feature, we let the machine drive the process of job changeovers and quality checks without stopping.

GL-837P advance

The ultimate in flexibility

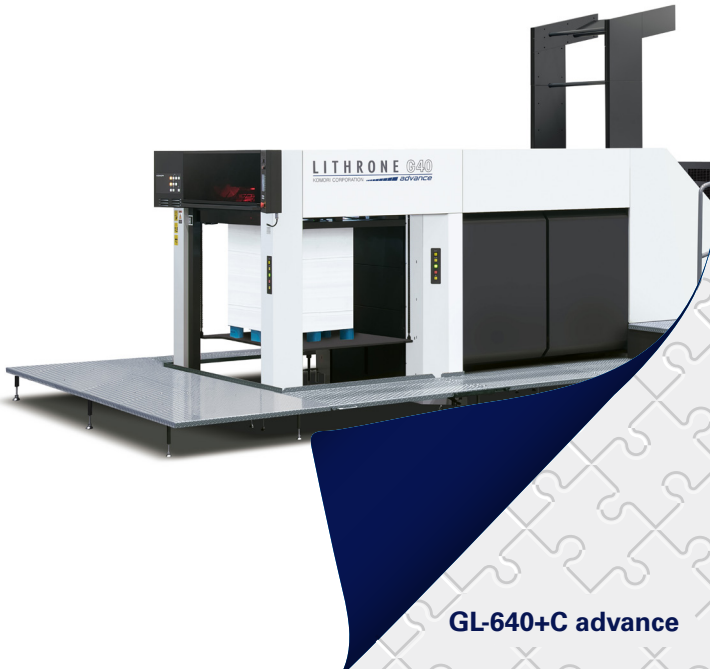

Shrinking run lengths and a requirement for product diversification are leading many printers to look for machines not only with super quick make readies, but also to provide them with opportunities to step into new markets.

- Effortlessly switch between commercial and packaging print
- Unbeatable R.O.I. levels
- Low cost of ownership

The GL-640+C advance has long been the press of choice for printers in both the commercial and packaging sector. With its

unbeatable R.O.I. levels and high-quality output, it has become a benchmark for reliability and low cost of ownership.

With a host of labour and energy-saving features as well as configurations and options that enable it to produce commercial print one moment and then effortlessly switch production into packaging products such as cartons the next, the GL-640+C advance is the ultimate in flexibility.

GL-640+C advance

Labour-saving and high performance

The MBO Cobo-Stack is the ultimate labour saving postpress equipment, a collaborative robot that picks up the stacks from the table and deposits them on pallets.

- Pallets on both sides of the cobot
 - Places 12 stacks of A4 sheets in one layer
 - Various grippers sizes available
- As a high-performance machine, the K8 is designed for exceptionally high production speeds and stability with minimum set-up times.
 - Optimum adjustment to production environment
 - Advanced levels of automation
 - High speed operation

**MBO K8 &
Cobo-Stack**

Wednesday 15 March and Thursday 16 March 2023

The programme will be identical on both Open Days

- 09:00 – 09:15 — Welcome and official opening
- 09:15 – 09:45 — Workshop:
produce autonomously
with Autopilot
- 10:00 – 10:30 — Live print demonstration:
GL-837P advance
- 10:45 – 11:15 — Live demonstration:
MBO K8 with Cobo-Stack
- 11:45 – 12:15 — Lunch
- 12:30 – 13:00 — Magazine and catalog
production with the
System G38
- 13:15 – 13:45 — Live print demonstration:
GL-640+C advance
- 14:00 – 14:30 — Workshop:
Smart packaging production
- 14:45 – 15:15 — Live workflow demonstration
with industry 4.0
