

# MONOLOX<sup>®</sup>

Fixed Anilox Printing

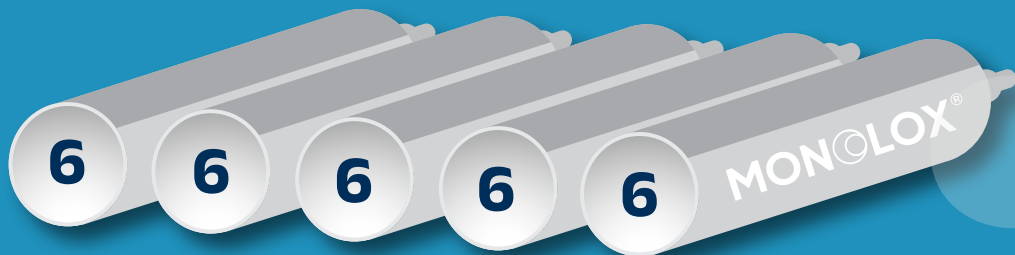

## How Monolox<sup>®</sup> takes the complexity out of label printing

### The current way

Your anilox inventory looks something like this.  
How easy is this to manage?

### The Monolox<sup>®</sup> way

The combination of fixed anilox depth, the high colour strength of Pulse's PureTone<sup>®</sup> ink range and a bespoke mixing database makes it possible to produce any spot colour using just one anilox volume.

- ✓ Enjoy average 30% ink volume and cost saving
- ✓ Simplify your anilox inventory
- ✓ Save time selecting the right roll
- ✓ Minimise press downtime

- ✓ Remove variability from anilox selection
- ✓ Enjoy control and consistency in prints
- ✓ Deliver standout quality print results
- ✓ Reduce ink waste

# MONOLOX<sup>®</sup>

Fixed Anilox Printing

## 5 simple steps to efficient label printing

1

### Calibrate

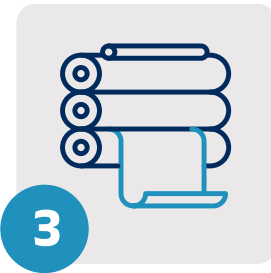

Fingerprint anilox with ink, substrate and press

2

### Mix Inks

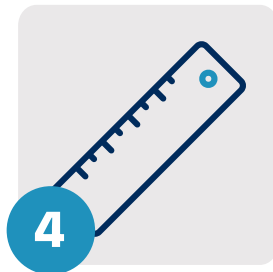

Use calibration data and bespoke mixing system with IFS to create ink formulation

3

### Print

Use one low volume anilox - Monolox - for all Pantone spot colours

4

### Measure & Approve

Measure Delta E of print vs. target colour and client specification (eg. Pantone book, digital Pantone, sample)

5

### Run the Job

Deliver consistent print from start to finish!

**Get in touch today to discover the benefits of Fixed Anilox Printing for your business!**
