

Sun Chemical Fluo series

Special ink series with fluorescent character.

Introduction

The Sun Chemical Fluo series is specially designed to give print jobs an additional value.

Application

The Sun Chemical Fluo series is designed for the sheet fed offset application. Basically the inks should be supplied in two layers. Single layers do not give the optimum result compared to the PANTONE colour guide.

Substrates

The inks are designed for the use on coated and uncoated paper. They are not suitable for the use on non absorbing substrates.

Properties

Code	Light	Alkaline	Alcohol	Solvent mix
Fluo801	2	+	-	-
Fluo802	3	+	-	-
Fluo803	2	+	-	-
Fluo804	2	+	-	-
Fluo805	2	+	-	-
Fluo806	2	+	-	-
Fluo807	2	+	-	-

The Sun Chemical Fluo series is a duct fresh series with low gloss and standard rub resistance. The inks are highly transparent and low in colour strength.
