PrintCare Rubber Blankets

UV

PrintCare UV is characterized by a microsphere compressible layer, which combines a long blanket life with good print quality. The micro-ground surface guarantees excellent print results in screen as well as in solid print. Ink and paper dust build-up is minimized and thus leading to prolonged wash intervals.

INNOVATION	AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve
TECHNOLOGY	PrintCare compressible layer is the most advanced production technique available and is the next generation in blanket manufacturing.
RELIABILITY	The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss.
VALUE	Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press.

surface

Rubber compound	Pure EPDM top compound
Surface finish	Buffed & polished
Roughness (Ra)	0,9 µm micro-ground surface
Colour	Red

construction

Compressible layer design	Microsphere PrintCare
Nominal thickness	1.96 mm & 1.70 mm
Fabric plies	4 & 3 plies

physical property

Thickness range	1.96 ± 0.02 mm and 1.70 ± 0.02 mm
Overall hardness (Shore A)	76 - 79°
Micro hardness (Shore A)	55°
Tensile strength at break	> 35 N/mm
Elongation at 10 N/mm	1.2 %
Compressibility indentation	approx. 12% at 100 N/cm ²
