OFFSET PRINTING BLANKETS

ADVANTAGE PLUS

Sheetfed blanket

The Advantage is a revolution in the development of offset printing blankets for the printing industry. The characteristics of its unique construction, which is based on the cord carcass, brings outstanding advantages up to 30% saving in comparison with standard offset printing blankets in the printing process.

Designed and formulated for wide range of sheetfed presses for printing on paper/carton stocks.

CHARACTERISTICS

ADVANTAGES

Dimensional Stability

Virtually no sinking or stretching giving the blanket exceptional dimensional stability. After mounting no need for further re-tensioning thus leading to reduced down time.

Closed Cell Compressible Layer

New compressible layer coupled with the radial cord carcass improves durability, gives excellent shock absorption and rapid recovery. Resists solvent penetration, reduces the risk of de-lamination.

Microground Printing Surface

The specially formulated surface compound is specifically ground in order to ensure excellent ink transfer and dot reproduction on a wide range of paper/carton qualities.

Sealed Bottom Layer

Gives added protection against water and chemical penetration.
