# PrintCare Varnishing Plate

## Extreme UV

PrintCare Extreme UV is made with thermo-hardening elastomers and manufactured with innovated technologies. This product is extremely suitable for long run UV coating applications.

<b>INNOVATION</b>	AtéCé a major global <b>blanket converter</b> leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve
<b>TECHNOLOGY</b>	PrintCare thermo-hardening elastomers surface has the highest resistance to aggressive UV coating and washes. It is reducing swelling and this is resulting in exceptional durability.
<b>RELIABILITY</b>	The consistency and quality of our new PrintCare surface layer technology and improved gauge control from our advanced buffing techniques gives a superior result
<b>VALUE</b>	Improvements provided by PrintCare means exceptional long life in UV coating applications.
<b>ECOLOGY</b>	PrintCare Extreme UV production is solvent free and CO2 neutral, another first in innovation by AtéCé.

## surface

Rubber compound	EPDM Rubber
Surface finish	Buffed
Colour	Black

## construction

Nominal thickness	1.15 mm & 1.35
Relief Depth	0.80 - 1.00 mm

## physical property

Overall hardness (Shore A)	60°
	Due to the fact that PrintCare Extreme UV is specially designed for UV coatings the plate is hard to peel.
	If the plate is put on a hot table the peeling will be much easier.
	Ask for the specifications.
